Manufaktur

## Blickdicht Manufaktur

Optimal visual protection for your demands of quality

Blickdicht Manufaktur is a family business from Neuss. For our quality-conscious customers, we manufacture exclusively individual, custom-made **Blidimax<sup>®</sup>** products of the highest quality.

You can order interior claddings and visibility mats for all travel trailers, caravans and off-road vehicles with raising roof. The use of the window mats is also easily possible in cars, trucks and boats

Special and special applications are also manufactured individually and made to measure - also for the winter garden or roof windows in the house.

Please feel free to contact us, we are glad to advise you!

# Protects and warms even below zero degrees

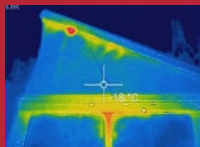

BLIDIMAX<sup>®</sup>roof

## OPTIMUM INSULATION

Our BlidimaX® roof mats for raising roofs are based on heat insulation certificated DIN EN 410: 2011-04

Recording at -20 °C with BlidimaX® and BlidimaX® roof

Recording inside the raising roof. Inside 20°C, outside -20°C

## BlidimaX® roof – great in cold weather!

Optimum visibility and heat insulation for your raising roof.

Freezing, cooling and nightly shadow cinema for the neighbors – these unpleasant side effects of the off-road and trailer-camping are now history. Because with the custom made **BlidimaX® roof** interior cover you are now comfortably warm inside your raising roof – even with frosty outdoor temperatures.

Our visibility and heat protection mats guarantee you high quality and effectiveness. We combine many years of experience in the offroad sector with the know-how of specialized material professionals.

### THE BENEFITS AT A GLANCE:

- **feel-good temperature instead of freezing and cooling**
- **80 % of heat remains in the interior \***
- **96 % of the outer skin remains outside \***
- **extremely reduced external noise**
- **functional cross ventilation**
- **sleep through darkness**
- **end of „shadow cinema“ for the neighbors**

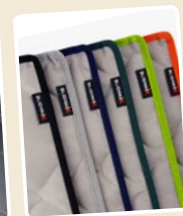

## Best outdoor quality from your manufactory

Individual production of your interior cladding in handwork

**BlidimaX® roof** stands for functionality and durability down to the smallest detail. We use eight selected layers for the inner panel of your pop-up roof, including fabric-reinforced aluminum composite film, nonwovens, other aluminum foils. In the core, foams and a spun fleece as decorative interior finish. Best outdoor quality with a pleasantly soft inside. Suitable for your interior cladding allows you to customize the design and from a palette of colors and seams, with up to 48 color combinations.

Your **BlidimaX® roof** is an individual custom-made product. The fastening system is tuned to the roof of your campers and adapted exactly. Here are Tenax®, LoXX® but also sturdy velcro. Measurement, manufacture and assembly will be held at the Blickdicht Manufaktur. Here you should schedule an appointment, because we can not complete the whole project in one day.

**BLIDIMAX**roof

\* Certified according to DIN EN 410: 2011-04 by the Hohenstein Laboratories GmbH & Co. KG. Tenax® and LoXX® are registered trademarks of their respective companies. BlidimaX® is a registered trademark of the Blickdicht Manufaktur.
